Preface

Introduction

Jurnal Kajian Peradaban Islam (*Journal of Islamic Civilization Study* - JKPIs) is motivated by lack of moslem-spiritual values to understand the contribution of islam to the development of many scientific disciplines for modern civilization. Hence, JKPIs attempts to integrate such kind science disciplines to Islam as a way of life on the modern civilization. For this purpose, JKPIs is designed as a unique peer-reviewed open access on-line scientific journal that provides an interdisciplinary, natonal, international and interfaith forum for scientist from any discipline areas. JKPIs publishes issues on May and November.

JKPIs is published by Perhimpunan Intelektual Muslim Indonesia (Association of Indonesian Moslem Scholar) or Vereinigung indonesischer Muslimischen Intellektuellen e.V (PRIMA e.V.) enabling the PRIMA to expand the service to provide an intellectual forum to assess the interdisciplinary islamic study. It encourages reflective thinking and progressive working on modern islamic civilization. In addition, JKPIs welcomes interfaith scholars to actively join, as we believe that development of Islam is important for the world society, regardless of the ideology.

The scopes

The scope of Jurnal Kajian Peradaban Islam are:

1. The theoretical or empirical studies about the application of Islamic and Sharia concept in many disciplines including social science, economic, politics, natural science and technology, law, etc.
2. The analysis of failures due to the ignorance of Islamic principles in many disciplines including natural social science, economic, politics, natural science and technology, law, etc.
3. Exploring the evidence of the Creator (Allah) contributing significant develpment to the Islamic civilization.

Peer Review Policy

Newly submitted manuscripts will first be screened by the main Editors. Manuscripts may be rejected at this stage if they are of insufficient quality, outside the scope of the journal or they are considered not original. Manuscripts that do meet the minimal requirements for publication are assigned to one of the main Editors, who sends the manuscript out for review. Reviewers are selected by the main Editors on the basis of their expertise, their availability, and such as to avoid possible conflicts of interest. A reviewer is asked to evaluate whether the manuscript is scientifically sound, original, relevant, clear, whether it correctly references previous work, and whether it falls within the scope of the journal.

All research articles in this journal have undergone rigorous peer review, based on initial editor screening and anonymized refereeing by at anonymous referees. The acceptance or rejection of articles will be decided by the editorial boards based on the review results supplied by the reviewers. There are no communications between authors and editors concerning the rejection decision. Authors whose papers are rejected will be informed with the reasons of the rejection.

All papers are fully peer-reviewed. We only publish articles that have been reviewed and approved by highly qualified researchers with expertise in a field appropriate for the article. We used single blind peer-reviewing process. To ensure the integrity of the blind peer-review for submission to this journal, every effort should be made to prevent the identities of the authors and reviewers from being known to each other.

Editorial Team

Editors in Chief
Dr. Eka Cahya Prima, M.T. Universitas Pendidikan Indonesia, Bandung, Indonesia

Editorial Boards
Dr. Agr. Muhamad Arief Soleh, SP., M.Agr.Sc. Universitas Padjadjaran, Bandung, Indonesia
